Topic: STARTUP CLUB

PURPOSE:

Web application idea where we create a Startup Club in the form of a social network web application. Here we allow users to submit their self-produced articles, product details, and videos for promoting their own business on the platform.

Users can review the list of submissions and promote whichever they like onto the front page of the app.

FEATURES:

1. Users can give reviews and rating to these startups.

2. Fund raising to the startups. The companies which are interested can fund these startups.

3. Users can give their contact details like email and submit queries to the respective group they are interested in.

4. Employment Generation: Introducing an Option for job opportunities where startup companies give notices about the kind of people they would like to hire.
